EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN SPECIFICATION

The original Abstract is replaced with the following new Abstract:

-- A charge transfer device having a charge transfer portion in which a plurality of electrode pairs are formed above a transfer channel, with the plurality of electrode pairs commonly wired forming N (where $N=2, 3, 4, \dots$ natural numbers) bits of the charge transfer portion bits so that electrode pairs of each half bit can be independently driven at every N bits, inputting the electrode pairs of each half bit with the same drive pulse to operate it by a two-phase complementary drive in a normal operation, and in an N-time speed operation, inputting the electrode pairs of N bits with N pairs of complementary drive pulses to operate them by a 2N-phase complementary drive. --.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

Claims 1, 3, 4-5, 7-8 and 24-25 (renumbered as 1-8) are considered allowable over the prior art of record since prior art of record fails to show or fairly suggest, *inter alia*, a charge transfer device and method having means for commonly wiring the plurality of electrodes pairs, and means for inputting drive pulse to operate in a normal operation and an N-time speed operation; wherein the phases of the reset gate pulse and the pulse applied to the electrode pairs at the last stage of the charge transfer portion to be similar as substantially described and connected in independent claims 1 and 5 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. Hirota '192, Hirama '053, Misawa '494, Yoshihara '228, and Harada '915 shown a CCD solid-state imaging device having means for inputting a transfer pulses and the reset pulses respectively.
